Q25. A tax credit allows an individual or business to reduce the final amount of a tax owed to government. In a “**tax-credit scholarship system,**” a government gives tax credits to individuals or businesses if they contribute money to nonprofit organizations that distribute private school scholarships.

A nonprofit organization gives a scholarship to a qualifying student who would like to enroll in a private school of their choice, including both religious and non-religious schools. The student’s parent then uses the scholarship to pay partial or full tuition for the chosen private school.

In general, do you favor or oppose a tax-credit scholarship system? Should appear only once

Q26. An “open enrollment” policy in K-12 education allows a student enrolled in public school to select and transfer to a public school of their choice, rather than attending a school based on where they live. A student can be allowed to transfer to a public school in another district (called “**INTER**-district”). The policy is based on a first come, first served process until districts are no longer able to accommodate new students. In general, what is your opinion of an open enrollment system?
